Dear Sir/Madam,

I am writing to express my interest in the Software Engineering Internship position at Mad Mobile LK, as advertised on our University Virtual Learning Environment. I am a 22 year old undergraduate currently pursuing a BSc (Hons) in Software Engineering and Computer Science at SLIIT City Uni, and I am passionate about using technology to solve real world problems and build impactful digital solutions.

Waiting for my results of second year (Semester 2), my academic background has given me a solid foundation in programming languages such as Java, PHP, and JavaScript, as well as experience in Android development and database management (MySQL). I have also worked on projects involving full stack development, API integration, and server side scripting, which strengthened my problem solving and debugging skills.

Beyond academics, I have gained practical experience through projects like Hire Us – Job Finder Platform (a web and mobile solution connecting workers and employers) and FOL Clothing (an e commerce mobile app and website with order management and notifications). These projects taught me how to write clean, maintainable code, work collaboratively in teams, and deliver solutions that meet user needs. Currently, I am expanding my knowledge by learning React and Node.js to strengthen my full stack development skills and keep up with modern industry practices.

I am particularly drawn to Mad Mobile LK because of its focus on innovation and quality software development. I am excited about the opportunity to contribute to your engineering team, learn from industry professionals, and further enhance my skills in software design and development. Enclosed is my CV for your review. I would welcome the opportunity to discuss how my technical expertise, dedication, and enthusiasm align with your team's goals.

Thank you for considering my application. I look forward to the opportunity to grow professionally and contribute meaningfully to your organization.

Sincerely,

Kavindu Bogahawatte
